

AI-Powered Video Conferencing for All-in-One Business Communication

Meet **FluentStream Video**, the newest way to connect, collaborate, and communicate, seamlessly integrated into the platform businesses already trusted for voice and messaging.

Why FluentStream Video?

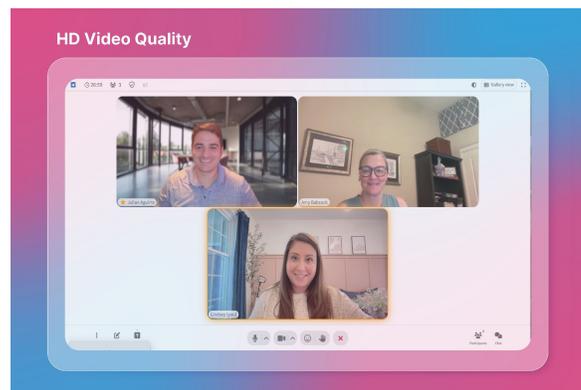

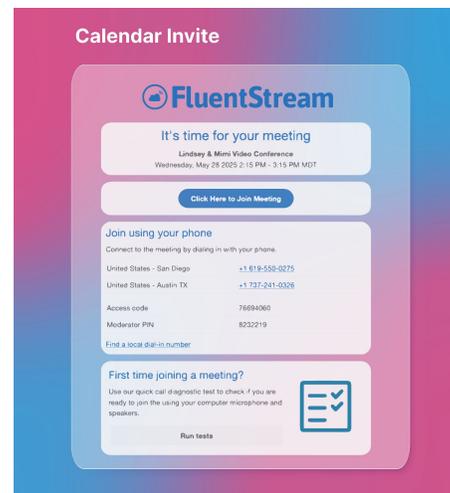

AI-Generated Meeting Summaries

Built-in AI automatically captures and summarizes key points, action items, and decisions. Summaries can be sent post-meeting, keeping everyone aligned and saving time.

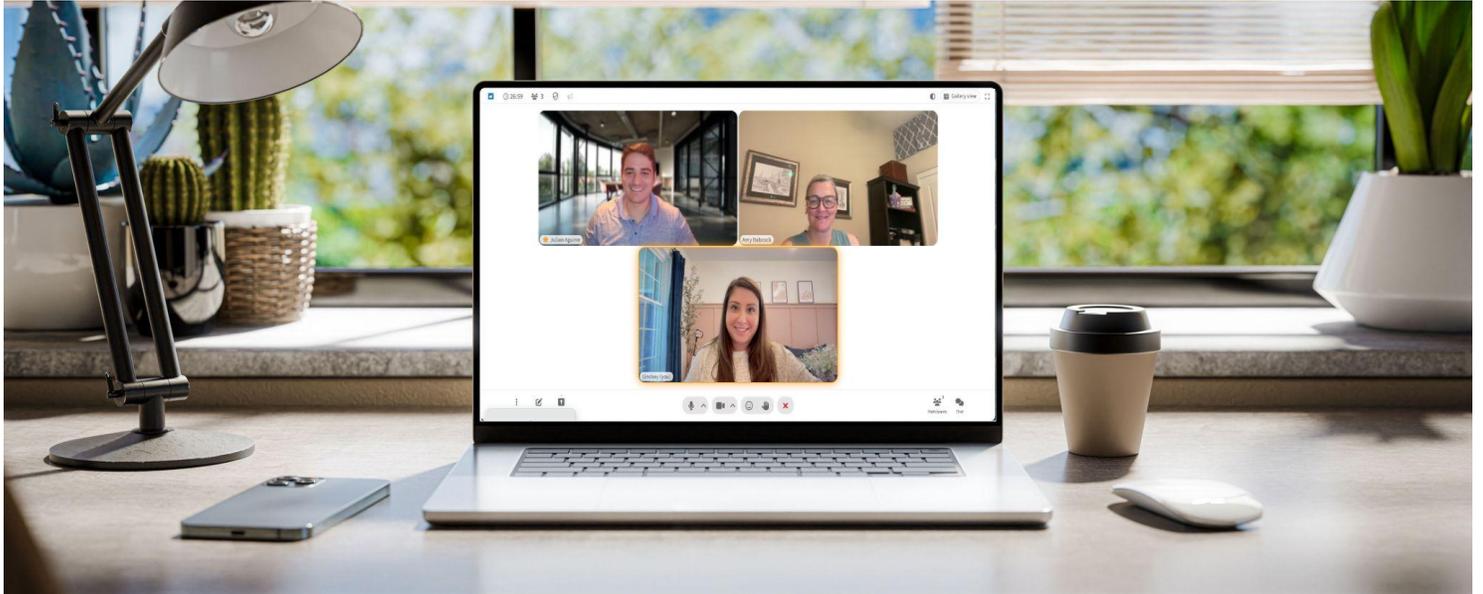

Calendar Integration

Launch meetings directly from your Google Calendar, or Outlook. It integrates with major tools to simplify scheduling, reduce no-shows, and help your team stay organized – without switching between platforms.

Secure & Scalable

HD-quality video meetings with end-to-end encryption with HIPAA and GDPR compliance. Flexible tiers offered for small teams, large meetings, or virtual events.

Available as a standalone video conferencing solution or fully integrated into your FluentStream cloud phone service. Set your hardworking business up with a complete communication platform.

Tailored Plans for Every Business

- +** **Standard:** Perfect for small teams and everyday collaboration
- +** **Pro:** Advanced features for growing teams and larger meetings (up to 250 participants)
**Note: AI generated summaries and recording only available in pro*

Webinar Solution for Large Events or Trainings

Our Webinar tier is built specifically for hosting large-scale events, virtual trainings, and presentations. With features like stage view, enhanced moderation, and live streaming, it's ideal for audience engagement at scale, with support up to 500 attendees.

Track success with detailed attendee reports, including engagement metrics, participation data and registration summaries.

We are here to help. Let's talk.
